PROJECTS

A voice through gunfire · Smart India Hackathon 2026, team Gradient Descent — 2026

Fine-tuned a causal speech-enhancement model (Facebook's Denoiser, dns48, 18.9M parameters) to pull a radio voice out of gunfire: SNR on the gunfire test clips from −1.1 to +8.9 dB on average. Exported PyTorch → ONNX → Core ML int8 (72 → 18 MB), about 54 ms per 4 s of audio on an iPhone.

Python · PyTorch · ONNX · Core ML · SwiftUI · Streamlit

India's inflation, explained — 2026

A Streamlit study of India's consumer price index: t-tests, ANOVA with Tukey post-hoc, OLS with VIF checks, and ridge / lasso tuned by k-fold cross-validation.

Python · pandas · statsmodels · scikit-learn · SciPy · Streamlit

Fruit Ninja, two ways · AI in software development case study — 2026

A webcam Fruit Ninja played with your hand, built twice (Claude and ChatGPT) from one brief to compare how each assistant builds software.

Python · OpenCV · MediaPipe

Perfect circle, in the air — 2026

Draw a circle in the air with one finger; MediaPipe tracks it and the game scores how perfect it is.

Python · MediaPipe · OpenCV · Pygame

Unlock — 2026

Gated links: visitors unlock a link by leaving an email or joining a community. A Next.js app with a Cloudflare Worker doing the redirects at the edge.

Next.js · TypeScript · Cloudflare Workers · Drizzle

BEYOND WORK

Dance (once a career path), vlogs and making videos.
